

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a semi-permanent reference electrode having a fill solution of a saturated salt that is hygroscopic, hydrolyzable and having a low deliquescence point, wherein the electrode further has a removable cap with an opening in the cap for moisture to pass there through and a removable porous plug situated within the electrode inner chamber. Typical reference electrodes are completely sealed and do not allow moisture to enter the sealed vessel.
